

DataFlex Reports 2025 – Standard Edition 25.2

For more information about DataFlex Reports 2025, please read the **"What's New"** section of the DataFlex Reports Help files.

Lines and boxes update version

Version 25.1 introduced the new Lines and Boxes Across Sections feature. This release focuses on addressing several issues reported following that update.

Duplicate Function / Parameter

You can now copy existing functions or report parameters, making it faster and easier to create new ones with just a few changes.

Crosstab line functions in Function Expert

Crosstab objects in the report with functions to format the lines were not shown in the function expert.

Important Information for Existing DataFlex Reports Users

1. DataFlex Reports 2025 - 25.2 is developed with DataFlex 2025. If you do not have a version of DataFlex 2025 running on your PC, the setup will automatically install a client for you.
2. DataFlex Reports 2025 - 25.2 can run side-by-side with previous version of DataFlex Reports.
3. Before installing this version you must first un-install any previous pre-release versions of DataFlex Reports 2025 – 25.2 you may have installed.
4. When migrating reports from an older version please study the readme and what's new information from the versions between v25 and v25.1/v25.2.

Supported Platforms

- Microsoft Windows 10 or 11
- Microsoft Windows Server 2016, 2019 and 2022
- All of the above are supported in 32 and 64-bit editions
- Windows Terminal Services when using Windows Server 2016 or Windows Server 2019

Registration

DataFlex Reports 2025 version 25.2 requires a registration code. The code supplied with v25.0 works with this release.
